

3D TELEVISION

Panasonic have made its latest Plasma TV, 3D enabled.

The Panasonic TX-P50VT20 has built-in Freesat HD and Freeview HD, 4 HDMI outputs, Viera Cast (Panasonic's online service) which has access to Twitter, Facebook, Youtube and Skype and 600Hz Sub-Field Drive Intelligent Frame Creation Pro technology, to name just a few of the features on board. The 3D images that have been seen on this model are said to be out of this world with a field of depth that is second to none. Panasonic are also providing two pairs of 3D Active glasses with this TV.

Watch jaw-dropping action leap off the screen with Samsung 3D technology. The UN55C7000 LED television brings new depth and dimension to it all— so you're not just watching the action, you're living it. Along with a visually stunning picture, it also features web-connected Samsung Apps so you can stream movies, play games, flip through photos, and more while you watch TV. And Real 240Hz Clear Motion Rate virtually eliminates all motion blur so your picture is crisp. Add a 6,000,000:1 Mega Dynamic Contrast Ratio and you'll experience a truly exceptional home entertainment experience.

3D GAMING

Last November, Sony Computer Entertainment Europe studio director Mick Hocking revealed that some 20 first-party PlayStation 3 games were being developed with 3D visuals. He also said that, including legacy and third-party titles, over 50 3D games were in the pipeline for the console, which was updated with the ability to play 3D games last June. Sony also included Killzone 3 in its 2011 3D lineup

With Sony having made plenty of noise about the bright 3D future it envisages for the PS3, Microsoft has now stated that the Xbox 360 is already fully kitted out with the tech required to join the dimensional revolution.

"From the technical standpoint, we are fully 3D capable," Microsoft's Aaron Greenberg told G4TV at CES, as spotted by Spong. "We have 3D games running today."

3D PROJECTORS

3D projectors are being released by many manufacturers and they have all got many different features the key part of these features is the contrast ratio due to you having to wear glasses they have to up the contrast what has produced very high quality and stunning pictures for every type of viewing whether it is SD HD or 3D

JVC have announced their three new 3D-ready D-ILA projectors. All three models have native contrast ratios that are unmatched in the industry, with the top model delivering an astounding 100,000:1 native contrast ratio.
